Fremington Community Primary & Nursery School

Equality Objectives

- We identify groups of pupils not making expected progress and make plans to support them.
- We ensure that all groups are represented across the school community and in the resources and activities we use within and outside the curriculum.
- We monitor attendance of pupils and identify and support groups who have poor attendance.
- We deal with bullying incidents effectively and track children who have been a victim of this, identifying any over represented groups.
- We aim to reduce the use of homophobic language by older pupils.
- We aim to close the gap between the achievements of pupil premium children and their peers.
- We create opportunities in the school curriculum social, moral and cultural development for learning about diversity in terms of disability, equality, culture, religion and heritage.
- Through our teaching we ensure that the contributions of different groups are represented and that prejudice is reduced through our teaching and resources such as books, posters, websites. Curriculum leaders monitor this through the school.
- We support pupils with SEND throughout the school by training specialist LSAs and providing equipment to support learning.
- We are an inclusive school and seek to embrace all children in learning together.
- The governing body and School Leadership team regularly review the equality objectives to ensure they are embedded and effective.
